

ARVIN LAURENT LIM MARRON

AUTOMATION SPECIALIST | FULL STACK DEVELOPER

arvinmarron03@gmail.com | 09765562247 | Urdaneta City, Pangasinan, Philippines

PROFESSIONAL SUMMARY

Freelance automation specialist and full-stack developer. I build automation systems that connect the tools businesses already use, like Make.com, Airtable, Notion, Slack, and Gmail, so repetitive work such as client onboarding and data entry runs on its own. I also work across the full web stack (PHP, MySQL, JavaScript, React) and have secured and maintained a live, high-volume transaction platform for a real client. Fluent English communicator (C1) looking for automation and technical VA roles where I can deliver reliable work and keep growing.

TECHNICAL SKILLS

- Automation & No-Code: Make.com, Zapier, n8n, Airtable, Notion, Slack, Gmail / Google Workspace, Webhooks & APIs
- Languages: PHP, JavaScript, TypeScript, HTML5, CSS3, SQL, Java
- Frameworks & Libraries: React, Next.js, Laravel, Tailwind CSS, Prisma
- Databases: MySQL, PostgreSQL
- Tools & Platforms: Git & GitHub, VS Code, Claude Code, Vercel, phpMyAdmin

FREELANCE EXPERIENCE

Freelance Web Developer – Security Remediation & Maintenance

Live Transaction Platform (Local Client) | May 2026 – Present

- Engaged to secure and maintain a live, high-volume transaction system
- Identified and removed critical security vulnerabilities left by a previous developer (unauthorized access points, hardcoded credentials, weak password hashing)
- Implemented hardening: server-side access controls, prepared statements to prevent SQL injection, and a migration plan for stronger hashing
- Documented the full process for reliability and transparency

Freelance Web Developer – Responsive Product Website

FIRBAN Cosmetics | June – July 2025

- Designed and built a responsive marketing website for a client's product, fully functional across desktop and mobile
- Stack: HTML, CSS, JavaScript

PROJECTS

Client Onboarding Automation

- One intake form onboards a client across five tools automatically: deduplicates records, routes new vs. returning clients to the right team, and sends Slack, Notion, and email updates.
- Stack: Make.com, Airtable, Notion, Slack, Gmail, Tally

eBarangay – Barangay Services System

- Full-stack platform digitizing a Philippine barangay's services, including resident records and document-based KYC with privacy-first storage.
- Stack: Next.js, TypeScript, Prisma, PostgreSQL, Auth.js

Real-time Operations & Transaction Platform

- Built a real-time operations platform end to end: role-based staff dashboards, a cashiering module, and live updates over WebSockets that keep every screen in sync.
- Automated end-of-day reporting; details generalized for confidentiality.
- Stack: Laravel, PHP, WebSockets, MySQL

EDUCATION & CERTIFICATION

Coursework in BS Computer Science

Saint Louis University, Baguio City

Trend Micro – CYBER DEFENSE SOCIETY 2024

Amazon Web Services (AWS) – Cloud Horizons: The AWS Kickoff

2nd International AI Edutech Summit
